Find	Learn about community assets	Plan	Create and connect
How do find people already leading local community action?	How do people learn about local community assets?	Does your programme go on to help local people develop and implement community action plans?	Does the programme actively nurture community connections and/or community development activity?
How do you connect with potential allies?	How do you work with local people to enable them to identify what is important to them?	If it does tell us what that might look like in practice	Does the programme actively fund community development activity?
Can people come to you directly? Do you actively seek them out?	Tell us specifically what you do and don't do here	If it doesn't how do local people plan together?	If it does tell us what that might look like in practice
